## Why use Warehouse Management Software?

Your warehouse management system (WMS) is the foundation of your operations. With data automation, real-time reporting, and features designed for everyday operations, your WMS takes the complexity out of operations.

Inventory accuracy

Get transparency from order to dispatch, with actionable data you can use in planning for future demand and growth opportunities.

- See real-time inventory levels and easily track seasonal changes or customer sales trends.

Mobile barcode scanning

Track stock movement, streamline inventory put away, pick and pack, and validate freight for dispatch.

Automated order tracking

Offer e-commerce and omnichannel fulfillment with automated order input directly from your customer's online store.

Flag urgent orders for fast dispatch

With CartonCloud's WMS, you and your customers can flag priority orders so they can be fulfilled urgently.

- With automated rate cards, services like priority orders can charge priority rates.

End-to-end simplicity with

Cloud WMS Software

Simplify day-to-day operations, streamline workflows, increase accuracy, and **get more hours back in the day**.
